Results-driven Software Engineer specializing in Flutter mobile app development and seamless backend integrations. Skilled in building high-performance applications with diverse payment gateways, ensuring smooth data flow and robust user experiences. Passionate about creating scalable mobile solutions that meet modern digital demands.

### WORK EXPERIENCE

#### Flutter Developer

07/2024 - Present

[AJA International](#) | Barsha Heights, Dubai, UAE

Managing the software of the largest & most reliable K-Beauty multi-brand store in the Middle East

- Developed the **K-SECRET Mobile App** built with Flutter, **expanding customer reach in the Gulf region by 30%** (available on [Google Play](#) and [App Store](#)).
- Implemented **conversion API tracking** for Meta and TikTok in the mobile app, **increasing revenue by 25%**.
- Built a **custom tracking platform** integrated with Flutter, **boosting the reach of targeted video ads by 40%**.
- Integrated various **payment methods**, including **Apple Pay**, **Google Pay**, **Tabby**, and **Tamara**, to support diverse user preferences.

#### Flutter Developer

11/2023 - 07/2024

[Better Digital](#) | Business Bay, Dubai, UAE

- Contributed to building **DrHero**, an online doctor appointment system using **Flutter** and **Laravel**.
- Integrated **payment gateways** such as **Zain Pay** and custom wallets with existing Flutter apps.
- Developed a Flutter application for a **SaaS PMS System** with **modular functionality**.
- Built a **CI/CD** pipeline in Flutter, **improving deployment time by 60%**.
- Created **Git workflow** for fellow developers, boosting collaboration and **cutting task completion time in half**.

#### Software Developer

03/2023 - 11/2023

Innov8Tech Education Services | Al Wasl, Dubai, UAE

- Enhanced the internal student management system using **Laravel & Filament**, hosted on **AWS**.
- Optimized the company's **WordPress** website to improve user engagement.

## Full Stack Web & Mobile Developer

11/2021 - 03/2023

[Airrsist](#) | JLT, Dubai, UAE

- Enhanced the existing **CI/CD** pipeline, **cutting deployment time by 20%**.
- Developed a **Flutter-based ticket scanning solution** used at **Fifa World Cup** events in Dubai and **Expo2020**.
- Created a mobile application in Flutter for the existing web events platform.
- Implemented real-time cart and order tracking on the backend system using **Laravel**, **Angular** and **Pusher** real-time service.
- Handled and resolved over 100 development tickets for core application features.

## Mobile Developer

04/2020 - 10/2021

Techno Plus Plus | Damascus

- Developed five e-commerce applications in Flutter, implementing efficient state management using **Bloc** and **Provider**.
- Transformed various UI/UX designs from Figma and Adobe XD into responsive Flutter interfaces.
